"Mebelgrad" Company was founded in 1997 based on one of the largest furniture enterprises in the Central Region of Russia, Beloberezhskaya Furniture Factory. Over 24 years of intensive development, the factory has grown into a large-scale industrial and commercial association producing upholstered, case, and solid wood furniture. Nowadays, "Mebelgrad" has its own drawing office, glass treatment area, case and upholstered furniture workshops, a solid wood processing workshop, a sewing workshop, a logistics service, and regional warehouses. The workshops are equipped with up-to-date Italian and German equipment and a photo printer that allows the implementation of wide-scale serial projects.

All furniture is certified; only environment-friendly materials are used in production. An extensive commercial network is represented by "Mebelgrad" own-brand stores in Bryansk, Oryol, Kursk, Rostov, Volgograd, Leningrad, Novosibirsk Oblasts, as well as dealer and sales offices in more than 100 cities within Russia. We have established export to such countries as Lithuania, Latvia, Moldova, Kazakhstan, and Germany. "Mebelgrad" company became the exporter of the year in the industrial sector and won the first position among the Bryansk Oblast exporters.
New products are displayed at leading specialized exhibitions, including international ones.

Highly qualified engineers, designers, and technologists participate in the design of furniture. A wide selection of textures and colors and an individual approach to a customer make it possible to create beautiful, comfortable, and functional high-quality furniture at an affordable price.

ShK-05 sliding-door wardrobe

The main fundamental advantage of this ergonomic piece of furniture is the saving arrangement of usable space. Despite modern layouts, most apartments remain small sizes, and it is esntial for them not to clutter up free space with furniture. One door of the sliding door wardrobe moves behind the other; they do not swing open to the sides as in classic wardrobes. Thus, space occupied by a sliding-door wardrobe is used in the most saving way.

If you want to decorate the interior of your home in a modern style and have no wish to waste a single meter of space, the usage of a sliding-door wardrobe is the perfect solution.

SPRING bed

A comfortable bed is one of the main parts of your guests' positive reviews. Spring Box is a bed system allowing to purchase a bed base, a mattress, a mattress pad (topper), and a headboard separately. Due to their multilevel structure, they are easily transformed from single beds to double ones.

Such a transformation ability is easy to format a double bed for the rest of two persons with a significant weight difference - each of them can select the most suitable mattress with an optimal orthopedic effect; a topper smoothes the border between two mattresses.

Advantages of Spring Box beds:

- Transformation ability for the current needs (single, double bed);
- Reduced wear of beds due to even spread of loads;
- Perfect orthopedic (anatomic) characteristics and comfort during the rest;
- Completeness of interior decoration;
- Moderate price compare to similar sets of conventional beds;
- Upgrade easiness (you may easily purchase separate modules, such as a base, without changing the entire bed);
- Quietness.

The toppers of different types will smooth the adjoining area of two beds, increase the lifespan of mattresses, and allow to harden/soften bed firmness/softness depending on guests' personal preferences.

Advantages of Spring Box beds manufactured by “Mebelgrad”

The Spring Box bed is manufactured of soft and pleasant to the touch materials (velour, eco-leather) for the improvement of aesthetic characteristics and ensuring maximum coziness.

Eco-leather

Velour

Headboard dimensions:
1.920x860 mm

Headboard dimensions:
2. 1550x860 mm

Our Spring Box beds may be equipped with a wall-mounted soft headboard ornamented with topstitching. Finishing and upholstery of eco-leather or fabric allows fitting a bed in a modern interior of a hotel room.

The bed stands on 4 chromed supports and is additionally equipped with 2 wheeled supports and a handle, whereby the bed is easily moved within the room what simplifies the room cleaning.

Rounded bed corners prevent injuries that your guests may get by negligence.

The bed base has a small board with a height of 1 cm which firmly fixes a mattress.

Every bed is equipped with a hidden connection lock that ensures the firm fastening of bases together. When beds are used separately, these locks are hard-to-see also.

The Spring Box beds manufactured by the "Mebelgrad" factory are remarkable with their enhanced comfort coupled with the security of service, durability, and safety. Their frames are produced of solid softwood and strengthened with reinforcing ribs, including two lengthwise and two transverse fiberboard rails with rectangular cross-sections and a thickness of 3 mm; the upper part is produced of birch plywood with a thickness of 4 mm.

Dimensions of the “Spring 900” bed base (WxDxH): 920x2020x360 mm

Children's room furniture

The "Sonya" modular system offers you a wide range of options for the selection of beds and their accessories.

Children grow up, so they have new interests and needs during all their childhood. The "Sonya" modular system allows constant extension of your child's bed by adding a ladder and a top bunk. In addition, the collection contains an assortment of textiles under a child's gender.
All this makes the "Sonya" bed much more than just a bed. "Sonya" will afford the excellent conditions in a room of your child — from a baby to a teenager. "Sonya" modular system is not only a variety of beds but also an exciting play space and a room decoration.
The "Mebelgrad" furniture factory presents 12 beds in different functional versions with accessories. These beds are assembled of identical packs like a construction set. Having bought an ordinary bed, you may transform it into a bunk bed — just by suppling the available bed with a ladder. It will be enough to purchase the missing packs or textile accessories for this. A bunk bed is easily transformed into two fully-functional standard beds.

Arrange the room space with love and creativity. Change the interior for the preferences or changing interests of your family members. Surprise your family and your friends with an unusual "playhouse". The "Sonya" modular system allows you to be creative without extra expenses. But the main advantage of "Sonya" beds is the solid pine of which they are made. This type of wood is durable, safe in service, and environmental-friendly.

"FRIGATE" children's room set

What could be more interesting than the creation of a personal world for your child! The nook, where he may feel like a character of his or her favorite stories, fairytales, and adventures. It is favorable when an interior saturated with the spirit of wandering and adventures surrounds your child instead of a dull space — the one that had been designed taking into account your child's interests, desires, and preferences. After all, every person, especially the little one, creates his or her universe!

Nowadays, photo printing is one of the most innovative technologies in the furniture industry. The furniture with UV images demands no particular attention; the prints are wear-resistant, it is to be treated like regular furniture. The ink used in printing is entirely safe and environmental-friendly. The printed image has no smell and issues no harmful materials. Facades of the "Frigate" children's room set are decorated in monochrome printing that ensures a pyrographic effect.

We accept the requests for the manufacturing of kitchen sets with custom dimensions. Various combinations of MDF facades lined with PVC film, plastic, acryloyl, natural veneer, enamel surface, and others are available.

Equipping with fittings and accessories of Blum, Hettich, Boyard, and other brands is possible. Pull-out containers, baskets, closers, various lifting mechanisms for cabinets, drawers with special sections for cutlery, and many other things which turn the kitchen into a well-planned and organized space.

MEBELGRAD

MEBELGRAD

Samples of MDF facade millings lined with PVC film

We also manufacture the sliding-door wardrobes of different systems with custom dimensions. The materials of insets and facades are laminated chipboard, MDF, mirrors, artificial leather, mirrors with sandblasting patterns, and others.

MEBELGRAD

Photo printing is an image that may be applied to a facade of your wardrobe. The visual space extension is the main characteristic of such wardrobes. The room gets spaciousness that is visible to a naked eye. Also, your furniture looks stylish and eye-catching. Every guest shall surely notice this and appreciate your taste.

The wide selection of textures and colors coupled with a personal approach to every customer allows creating a cozy and functional atmosphere in inhabited rooms.

Image of any style may be applied to a wardrobe facade.

You may provide your image with a high resolution of 300 dpi 3500x2400 pixels and more, as well as select an image from our gallery or edit an image with our designer.
All your demands and wants will be taken into account.

Mechanism type: “eurobook”
Decorative elements: inverted seam

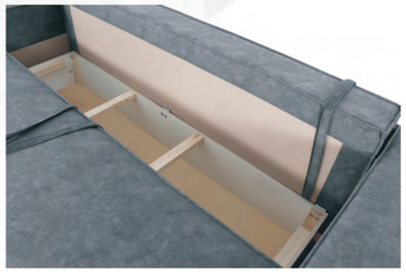

*the picture shows the "Toulon" sofa of "Alicante Grey" fabric.

MEBELGRAD

TOULON straight sofa

Nowadays, the Loft style is at its peak — country houses, apartments, and offices are arranged with this style. Such interiors look a bit rough but then unusually and stylish. Besides the typical brick walls, they are characterized by suitable furniture with a tasteful and versatile sofa as the centerpiece. Easiness of implementation is one of the advantages of such a design. The furniture encasements are sewn according to "inverted seam" specific technology that differs this soft sofa from similar ones.

The picture shows a sofa with additional ornamental pillows (may be purchased separately).

MEBELGRAD

ONTARIO
straight sofa

Dimensions (WxDxH): 2240x1100x710 mm
Sleeping space: 1940x1460 mm
Seat height from the floor: 460 mm

PILLOWS
ornamental pillows

ornamental pillows

Ornamental pillows take a particular position among the accessories offered as supplements to the main products of "Mebelgrad" LLC. Having different or identical shapes and consisting of dissimilar or similar materials, they will decorate your couch or sofa in addition to providing it with extra comfort.

Ornamental pillow No.1
Dimensions (WxDxH): 400x400 mm
Filling: polyurethane foam, Sorel
Shape: square

Ornamental pillow No.2
Dimensions (WxDxH): 400x400 mm
Filling: polyurethane foam, Sorel
Shape: square
Decorative element: ornamental piping

Ornamental pillow No.3
Dimensions (WxDxH): 500x500 mm
Filling: polyurethane foam, Sorel
Shape: square
Decorative element: ornamental piping, button

Ornamental pillow No.5
Dimensions (WxDxH): 300x600 mm
Filling: polyurethane foam, Sorel
Shape: rectangle
Decorative elements: ornamental piping

Ornamental pillow No.6
Dimensions (WxDxH): 400x600 mm
Filling: polyurethane foam, Sorel
Shape: rectangle
Decorative elements: ornamental flange

Ornamental pillow No.7
Dimensions (WxDxH): 150x500 mm
Filling: polyurethane foam, Sorel
Shape: roll
Decorative elements: ornamental piping

Designers often use pillows as accent colors. If your room's shades are mostly neutral, the ornamental pillows ensure it with more brightness. Such decoration elements are used not only as bright spots but also for retaining general interior design.

Length: 1200/1400//1600/1800/1900/2000 mm
Width: 600/700/800/900 mm

Kids Duos

100 kg | 13 cm | SOFT / HARD | 18 month

Length: 1200/1400//1600/1800/1900/2000 mm
Width: 600/700/800/900 mm

Kids Dream

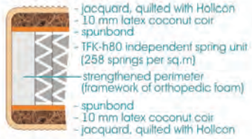

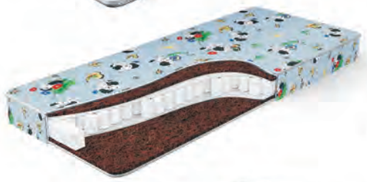

80 kg | 12 cm | MEDIUM | 18 month

Length: 1200/1400//1600/1800/1900/2000 mm
Width: 600/700/800/900 mm

Kids Smart TFK

80 kg | 11 cm | MEDIUM | 18 month

Length: 1200/1400//1600/1800/1900/2000 mm
Width: 600/700/800/900 mm

Kids Comfort TFK

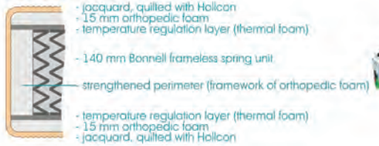

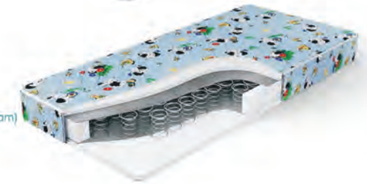

80 kg | 13 cm | SOFT / MEDIUM | 18 month

Length: 1200/1400//1600/1800/1900/2000 mm
Width: 600/700/800/900 mm

Kids Simple

90 kg | 17 cm | SOFT | 18 month

Length: 1200/1400//1600/1800/1900/2000 mm
Width: 600/700/800/900 mm

TOPPERS

FOAM topper

FOAM topper of orthopedic foam, which is a modern environment-friendly synthetic filler causing no allergy. Due to its features, you can adjust mattress firmness and flat the surface of a mattress or a sofa. Corner rubber bands ensure a reliable attachment to a mattress.

LATEX topper

LATEX topper of natural latex. Due to its features, you can soften your mattress firmness and improve the anatomical features of your bedding. Corner rubber bands ensure a reliable attachment to a mattress.

COCOS topper

COCOS topper of natural coconut coir. Due to its features, you can harden your mattress firmness and improve the anatomical features of your bedding. Corner rubber bands ensure a reliable attachment to a mattress.

SELECT topper

SELECT topper of orthopedic foam and coconut coir with double-sided firmness. Due to its features, you can soften or harden your mattress firmness just by turning the topper over. Corner rubber bands ensure a reliable attachment to a mattress.

SonLine protective mattress pad

The mattress pad provides additional protection from dust, strains, and other contaminations which may arise during mattress use and extends mattress lifespan. The mattress pad may be washed with a washing machine.

Aqua Stop mattress pad

Aqua Stop mattress pad is made of soft wear-resistant fabric. The backside has a breathable and moistureproof layer. It is easily fixed on a mattress with edge of fabric with a rubber.

Toppers 1900x1500 mm for "Caesar", "Flash", "Calgary", and "Tom" straight sofas

Toppers 2000x1500 mm for "Monaco-6", "Turin", "Toulon", and "Ontario" corner sofas

Toppers 2000x1600 mm for "Boston", "Cesar", "Monaco" corner sofas

Toppers 1900x1600 mm for the "Bremen" straight sofa

Toppers 1900x1300 mm for the "Lyre-3" straight sofa

ORTHOPEDIC PILLOWS

Pillows of conventional shape made of Memory Foam special-purpose material, which fits with your body's position and ensures maximum comfort. Constant retaining of coolness that gets you rid of an annoying hot pillow is another characteristic of this material.

"Classics" orthopedic pillow

Width: 580 mm
Depth: 370 mm
Height: 110 mm

"Two-waved" orthopedic pillow

Width: 590 mm
Depth: 385 mm
Height (small wave): 90 mm
(big wave): 110 mm

FURNITURE CARE

Care for laminated chipboards and MDF is elementary. Most impurities may be cleaned off with just a wet rag. If a wet rag is not enough, you should try a disinfecting wipe (successfully removes even marks of pens and fine liners). At the end of "cleaning activities", it is necessary to wipe the furniture with a dry rag. What else may be used? Soap solution, alcohol, White Spirit, acetone, ammonia, "Polyrol-2".

What should not be done
- Do not place laminated chipboard and MDF furniture very close to heating devices.
- Leave a gap of 5-7 cm between them.
- Avoid getting of water in the joints of furniture edges.
- Do not use abrasives, whiteners, solvents, and gasoline for cleaning.

Eco-leather
Eco-leather, like all inventions of humankind, was designed to facilitate the life of modern housekeepers. Therefore, it is incomparably easier to care for it than for natural leather and many other materials. Most impurities like the ones mentioned above may be easily removed with a wet rag. If a wet rag is not successful enough, use soap solution, dishwashing detergent, ammonia, hydrogen peroxide, glass cleaner, or special-purpose stain removers for artificial leather. In the end, rub the surface dry as usual.

What should not be done
- Do not use brushes, chlorine, acetone, and absolute alcohol.
- Do not place furniture very close to heat sources.
- Do not dry eco-leather with a blow dryer, do not use a flatiron.
- Pay careful attention to the length of your pets' claws.
- And, of course, hide a permanent marker from children!

Glass and metal
Glass and metal require more frequent care due to their gloss surfaces retain visible even fingerprints, not to mention dust and dirt. So women have to make a tough choice between the obvious attractiveness of metal and glass furniture elements and the facilitation of their daily household chores.

We have the good news for persons who prefer beauty. Any impurity is removed much easier from glass and metal, and the selection of care products is wider than the ones for eco-leather, laminated chipboard, and MDF.

Most impurities are easily cleaned off with a combination of a rag and a special-purpose glass and/or metal cleaner. However, a rag should be chosen carefully due to many types of fabric leave streaks and lints. So, if you wish to see your furniture's decorative elements shining, a microfiber rag is the best choice!

We realize that cleaning is not everything in a woman's life. Therefore, designers take great pains to develop not only attractive and functional but also easy care furniture. Appreciate the results of their efforts in our catalog and our partners' stores. Also, ease of care and use directly depends on the material quality, so you should pay attention to this.

We wish you easy cleaning and long enjoyment with the perfect appearance of your favorite furniture.
